EDUCATION

**B.Tech in Computer Science
Engineering**

REVA University Expected Graduation:
May 2027

TECHNICAL SKILLS

- **Programming:** Python, Java
- **Data:** CSV Processing, Data Preprocessing Backend &
- **Backend & Systems:** FastAPI, REST
- **APIs Tools & Platforms:** Git
- **Core Areas:** Machine Learning, GenAI, ML Pipelines
- **Web Development :** React.js, java script, css ,

SKILLS

- Problem Solving
- Analytical Thinking
- System Design
- Technical Communication

PROFESSIONAL SUMMARY

3rd-year B.Tech Computer Science student with strong foundation in software development, machine learning, and full-stack systems. Experienced in building data-driven applications, predictive models, and scalable web platforms. Skilled in designing end-to-end solutions combining frontend, backend, and ML pipelines. Actively practicing data structures and algorithms with focus on performance-oriented problem solving. Seeking to contribute to impactful software and AI-driven systems.

PROJECTS

AI-POWERED ACTIVE RECALL MATERIAL GENERATOR

Developed an AI-based system to convert study material into structured summaries, quizzes, and flashcards using NLP techniques. Implemented content extraction, text processing, and automated question generation to enhance learning efficiency through active recall.

- Tech: Python, NLP, Machine Learning

Bank Churn Prediction System

Engineered a supervised learning pipeline for customer attrition prediction using high-dimensional behavioral and transactional datasets. Performed feature engineering and model optimization to improve prediction reliability and system performance.

- Tech: Python, Machine Learning

ONGOING PROJECTS

AI-Powered Personal Productivity & Digital Wellbeing System

Designing a system to monitor daily activities, task completion, and screen time across devices. Implementing data tracking, behavioral analysis, and adaptive planning features to improve productivity and digital wellbeing.

- Tech: Python, Full Stack Development
